INVERPAC®

POOL HEAT PUMP

Beyond all your expectations

CONTENT

04 Introduction of INVERPAC

INVERPAC Technology **08**

18 INVERPAC Turbo

INVERPAC Elite **26**

32 INVERPAC Commercial

POOLCLUB MiNi Q **38**

Poolclub konzentriert sich auf die Harmonie zwischen Mensch und Natur und setzt sich dafür ein, das Schwimmerlebnis durch umweltfreundliche, zuverlässige und effiziente Technologie zu verbessern.

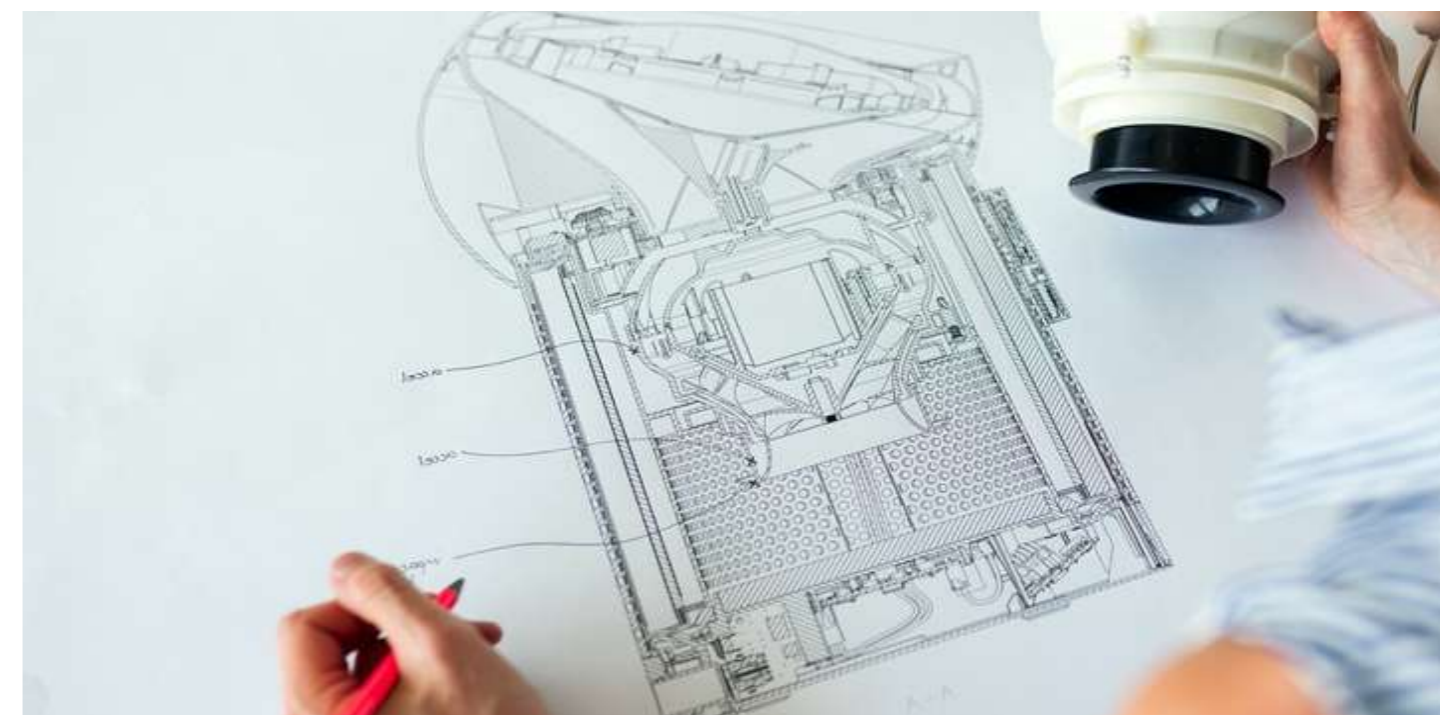

Poolclub focuses on the harmony between human and nature, and is committed to enhancing swimming experience by environmental-friendly technology and science, increasing the efficiency of swimming pool usage.

INVERPAC® TURBO

INVERPAC IS A SMART INVERTER POOL HEATING SYSTEM.

Adhering to the concept of "GREEN EARTH", we have been devoting in the research & development of application of air-source energy.

Integrated with high-performance compressor, twisted spiral titanium heat exchanger, inverter silent fan and hydrophilic coating evaporator, based on intelligent inverter technology, INVERPAC maximizes the utilization of air source energy while maintaining characteristics of good stability, whisper quiet operation and high efficiency.

THE INVERPAC FAMILY

INVERPAC®

15 + YEARS DEDICATION ON POOL HEAT PUMPS

FOCUS MAKES PERFECTION

SMART INVERTER TECHNOLOGY

TURBO MODE

Fast heating with extra 20% capacity optimized for cold seasons down to -20°C.

SMART MODE

Best combination of performance and silence, pool heat automatically maintain the temperature at your preset value.

SILENT MODE

Whisper quiet, friendly neighborhood, INVERPAC operates at lowest consumption of power.

INVERPAC pool heat pump applies full inverter technology, the commander chip utilizes the performance of every components to maximize the efficiency of pool heating.

FULL INVERTER COMPRESSOR

The **compressor** is the “heart” of a pool heat pump. To maintain a stable performance, INVERPAC's compressor is a compressor specially for air energy, which can provide a steady power supply.

- -20°C AMBIENT WORKING TEMPERATURE
- 0~100% CONTINUOUS VARIABLE SPEED
- ±0.1 BAR ACCURATE AND CONSTANT PRESSURE SUPPLY
- TWIN-CYLINDER STRUCTURE
- HIGH COMPRESSING RATE

HYDROPHILIC EVAPORATOR

The **evaporator** is a place where heat exchange happens, According to the heat exchange formula:
 $Q=KA\Delta t$

The absorbed heat Q is proportional to the heat coefficient K, the heat exchange area A and the heat exchange temperature difference Δt . After hundreds testing, **INVERPAC designed the best efficient evaporator for the heating system.**

It has a perfect fin gap to reduce the forming of frost, the best area for high efficiency, the hydrophilic coating for anti-frosting.

- **2MM PERFECT FIN GAP**

- **1 μ M HYDROPHILIC COATING**

- **45% WIND LOSS REDUCTION**

- **5%~10% HEAT EXCHANGE INCREASE**

TITANIUM HEAT EXCHANGER

In order to further improve the heat exchange efficiency, INVERPAC adopts the twisted spiral pure **titanium heat exchange tube**, which is **corrosion-resistant** and has **good thermal conductivity**, high **heat exchange efficiency**.

The twisted design enables 30% extra contact surface for water and refrigerant, the speed of flow passing through is lower, thus leave more time for heat exchanging.

- 30% EXTRA HEAT EXCHANGE AREA

- 200% HEAT EXCHANGE EFFICIENCY

- LESS SCALING INSIDE THE TUBE

CONTROL

- ANYWHERE
- ANYTIME

Tuya smart

* LANGUAGE OPTIONS

English, German, Swedish, French, Spanish, Italian, Czech, Polish, Russian, Chinese

- Smooth touch control panel
- Heating-Cooling-Auto mode
- Temperature setup
- Timing switch
- Screen lock function

INVERPAC TURBO

INVERPAC

The INVERPAC TURBO series heat pump is applied with INVERPAC full inverter technology, 3 different modes controlled by the smart chip. It's the best guarantee for a better swimming experience.

4-SEASON OPERATON

The INVERPAC inverter technology enables the heat pump working at a temperature of -20°C , the auto-defrost function enables the continuous heat exchanging under extreme condition.

WHISPER QUIET

Special design for sound absorption, sound proof. 39~45 dB(A) *1m

MITSUBISHI COMPRESSOR

It provides a constant power to the refrigerant, reliable and efficient.

ALUMINIUM

ASA cover and aluminium body, the perfect team to provide safety protection for the heat pump which has strong resistance to UV, chemical and color fade.

ELITE

UNIQUE DESIGN

ABS cabinet, durable and anti-corrosion.

LOW TEMPERATURE OPERATION

INVERPAC Elite is capable to work on low temperature of -12°C.

TITANIUM HEAT EXCHANGER

Twisted spiral titanium heat exchanger, super efficiency, antiscaling.

WHISPER QUIET 40~52 DB(A) *1M

As a result of sound proof treatment inside the heat pump, INVERPAC Elite generates much less noise than ordinary heat pump.

AUTO-DEFROST

Auto-defrost function, the chip monitor the stream of the refrigerant and the performance of the heat pump, defrost function will be controlled automatically.
