

Chemical products for water treatment

Castelnuovo R. (MO) April 2, 2024

To whom it may concern

Object: Compliance to ISO EN 15077:2013 and BPR

UNI EN 15077:2013 describes the Sodium Hypochlorite characteristics and proof methods. Barchemicals products follow the above Regulation for all their products based on Sodium Hypochlorite.

In 2012 in Europe was born the BPR process UE 528/2012 that aims to harmonise the market at Union level, simplifying the approval of active substances and authorisation of biocidal products.

The Biocidal Products Regulation (BPR, Regulation (EU) 528/2012) concerns the placing on the market and use of biocidal products, which are used to protect humans, animals, materials or articles against harmful organisms like pests or bacteria, by the action of the active substances contained in the biocidal product. This regulation aims to improve the functioning of the biocidal products market in the EU, while ensuring a high level of protection for humans and the environment.

Barchemicals is involved in BRP process with products based on Sodium Hypochlorite and other active ingredients; at the same time Barchemicals products used as disinfectants in water are registered at Italian Ministero della Salute as "Presidi Medico Chirurgici".

Best Regards
Barchemicals srl
